

Dental

Toronto, ON, Canada

Walmart has welcomed dental franchises into 25 of their Supercenters. A longstanding relationship with LSI prompted the design team to open the folders and seek a solution for this budget sensitive, performance driven project. The EDGE Collection satisfied the requirements.

For this collection, LSI has taken its top selling wood plank patterns and value engineered them to provide a timeless aesthetic with a price advantage. These floors are durable, resist shrinking, warping and stains and ensure a high slip resistance that only improves when it gets wet.

With the success of the first location these clinics have been using LSI EDGE throughout.
